Profile

Goal-oriented developer with extensive expertise in website architecture design and web API design. Demonstrated ability to complete projects efficiently and effectively, with a meticulous attention to detail and a creative approach. Proficient in Backend and Frontend technologies, including SQL and NoSQL databases. Experienced in utilizing Business Intelligence Services to create and generate reports. Committed to ongoing learning and professional development, including the adoption of new programming languages and the creation of innovative applications. Challenging myself with new things it is the reason that keeps me motivated.

Experience

Republika Digital LLC
Full Stack Developer
Pristina
March 2023 - Present

- Spearheading the development of scalable web applications using ReactJS and NextJS, including an app facilitating offline caching and real-time scanning for over 100,000 event attendees, ensuring seamless functionality in challenging network conditions
- Working in the implementation of cashless payment systems using bracelets, revolutionizing festival payments for events like Sunny Hill Festival, SOHO House and others, resulting in increased revenue and customer satisfaction
- Leveraging PHP and Laravel on the backend to craft robust and efficient systems, managing data seamlessly through SQL and NoSQL databases and optimizing system performance and scalability
- Developing and doing maintenance of a versatile application utilized by multiple clients, showcasing adaptability and skill in meeting diverse client requirements while ensuring consistency and quality across deployments
- Playing a pivotal role in testing applications for security vulnerabilities and latency issues, contributing to enhanced system reliability and performance through the identification and resolution of critical issues
- Effectively managing development workflows using GitLab for version control and Jira for project management, facilitating streamlined collaboration among team members and ensuring timely project delivery

MOVA Group
Full Stack Developer
Gilan
July 2022 - March 2023

- Collaborated with UI/UX designers to create visually appealing interfaces and intuitive user experiences. Managed large-scale design projects for prestigious corporate clients, integrating advanced technologies like Tailwind CSS and CSS3 components
- Spearheaded the development of digital recruitment and HR management applications, revolutionizing traditional processes. Leveraged technologies such as ReactJS, NextJS, and Typescript to engineer dynamic and responsive web applications. Integrated third-party APIs for functionalities like online interviews and utilized Strapi CMS for comprehensive content management
- Successfully orchestrated application hosting on industry-leading platforms like Google Cloud Platform (GCP) and Amazon Web Services (AWS), ensuring robust and efficient system deployments. Designed scalable databases using Firebase and DynamoDB, prioritizing data integrity and optimizing performance
- Proactively maintained web applications, conducting regular updates and optimizations to ensure ongoing functionality, performance, and user satisfaction. Demonstrated adaptability and expertise in tackling diverse projects
- Collaborated closely with cross-functional teams to address complex challenges and achieve project objectives efficiently. Utilized technologies such as Github for version control and Jira for project management, fostering streamlined collaboration and timely delivery

Software Development Solution
Backend Developer Intern
Pristina
April 2022 - June 2022

- Designed and developed web applications and microservices using PHP/Laravel and Lumen, demonstrating proficiency in modern web development frameworks
- Implemented and managed databases with MySQL, ensuring data integrity and efficient data storage
- Conducted comprehensive code testing and generated detailed Technical Reports, contributing to software quality and documentation
- Organized and streamlined workflow through the effective use of project management tools, including GitHub, facilitating task tracking and team coordination
- Coordinated and collaborated seamlessly with team members using communication tools such as Discord, ensuring efficient project progress
- Demonstrated exceptional adaptability by readily taking on diverse projects, embracing new technologies, and contributing to the team's success while continuously expanding skill sets

Skills

PHP	Laravel	Typescript	ReactJS	NextJS
Javascript	HTML5	CSS3	SQL	NoSQL
AWS	GCP	Github/Gitlab		

Education

"Kadri Zeka" University
Bachelor of Computer Science
October 2019 - July 2022

Certifications

Web Development
SocialHub

Hands-on training in Front-end (HTML, CSS, Javascript) and Back-end (C#, MVC) web development, with a focus on Git/Github use

Web Development Practitioner
Kosovo ICT Support

Hands-on training in Front-end web development with HTML, CSS, SASS, Javascript, jQuery, and CMS (Wordpress) development

Cyber Security
Kosovo ICT Support

Successfully acquired skills in securing computer systems and protecting against vulnerabilities and manipulations

Interpersonal Skills

Goal Oriented	Responsibility	Teamwork	Flexibility	Patience
